

Endress+Hauser expands US production

Group extends Raman analyzer production and builds new plant for temperature measurement production

Measurement engineering and process automation specialist Endress+Hauser has further expanded its production facilities in the United States. The Raman analyzer manufacturing plant in Ann Arbor, Michigan, was extended at a cost of 9 million US dollars. In Greenwood, Indiana, the company has built a new 8 million dollar plant for temperature measurement production.

Kaiser Optical Systems, part of the Endress+Hauser Group since 2013, manufactures Raman spectroscopy devices in Ann Arbor, Michigan. The analyzers, which are designed for examining the composition and material characteristics of solids, liquids and gases, are deployed in process and in the laboratory. Endress+Hauser is pursuing a strategy that involves the employment of advanced analytical engineering in process applications and supporting customers in lab and process.

Construction of the new 9 million dollar plant took nearly one year and more than doubles the floor space to 8,100 square meters (87,000 square feet). With roughly 100 employees worldwide, Kaiser Optical Systems is thus gearing up for additional growth. “The expansion will allow us to produce our analyzers in even higher volumes and with the quality that our customers around the world demand,” emphasizes Tim Harrison, Managing Director of Kaiser Optical Systems.

Customer-specific production

In Greenwood, Indiana, where the US sales center is also headquartered, Endress+Hauser has manufactured temperature measurement technology and system products since 2008. The company has now invested more than 8 million US dollars in a 3,900 square meter (42,000 square feet) state-of-the-art production facility. The new plant will produce sensor elements, thermometers and thermowells as well as transmitters, system components and recorders.

“The new facility demonstrates Endress+Hauser’s commitment to the market and customers in North America. It shows that we are dedicated to manufacturing and providing services close to our customers,” emphasizes Patrick McGlothlen, the plant’s Managing Director. While producing for its home market in the US, the Greenwood facility also supplies customers in Canada, Mexico, Brazil, Argentina, Colombia and Chile quickly and flexibly with customized products.

Strong presence in the United States

Endress+Hauser has been present in the US with its own sales center since 1970. The company relies on a dense, nationwide network of select representatives to service customers. In the US Endress+Hauser produces instrumentation for flow, level, pressure and temperature measurements, liquid analysis technology, Raman spectroscopy instruments and laser-based gas analyzers. The Group employs more than 850 people in the US.

Endress+Hauser has inaugurated a new plant for temperature measurement engineering and system products in Greenwood, Indiana.

The Endress+Hauser Group

Endress+Hauser is a global leader in measurement instrumentation, services and solutions for industrial process engineering. The Group employs 13,000 personnel across the globe, generating net sales of more than 2.1 billion euros in 2016.

Structure

With dedicated sales centers and a strong network of partners, Endress+Hauser guarantees competent worldwide support. Our production centers in 12 countries meet customers' needs and requirements quickly and effectively. The Group is managed and coordinated by a holding company in Reinach, Switzerland. As a successful family-owned business, Endress+Hauser is set for continued independence and self-reliance.

Products

Endress+Hauser provides sensors, instruments, systems and services for level, flow, pressure and temperature measurement as well as analytics and data acquisition. The company supports customers with automation engineering, logistics and IT services and solutions. Our products set standards in quality and technology.

Industries

We work closely with the chemical, petrochemical, food & beverage, oil & gas, water & wastewater, power & energy, life science, primaries & metal, renewable energies, pulp & paper and shipbuilding industries. Endress+Hauser supports its customers in optimizing their processes in terms of reliability, safety, economic efficiency and environmental impact.

History

Founded in 1953 by Georg H Endress and Ludwig Hauser, Endress+Hauser has been solely owned by the Endress family since 1975. The Group has developed from a specialist in level measurement to a provider of complete solutions for industrial measuring technology and automation, with constant expansion into new territories and markets.
