## ***Kaiser Optical Systems and S■PACT announce collaboration in the process analytics market***

**ANN ARBOR, MI (July 31, 2017)** – Kaiser Optical Systems Inc. (Kaiser) and S■PACT are pleased to announce the completion of the first year of their alliance in Process Analytics to develop Raman solutions for the process market.

“We are convinced that it takes more than just high quality instrumentation to serve customers’ needs”, confirms Kaiser’s Managing Director Tim Harrison. “The right combination of high quality instrumental data, analytical methods, and automation provides our customers savings when developing and improving manufacturing processes.”

Our new alliance covers custom analyzers as well as Global Solutions currently developed by Kaiser to serve dedicated markets. Analytical approaches using univariate data analysis, multivariate analysis as well as hard modelling approaches are available.

“By aligning the resources of our company with Kaiser we are able to serve new customers in new territories and industries while furthering our mission to help companies realize the benefits offered from process analytical solutions”, Clemens Minnich notes.

The combination of skills provided by Kaiser and S■PACT allow us to guide the customer to the right equipment solution, design of experiment, and data analysis approach. This support allows us to serve both small companies that can benefit from Raman but do not have the skills on staff to support a new analyzer evaluation or deployment as well as large companies looking to outsource analytical development.

Over the last year of the alliance alone, more than 20 companies have benefitted from this alliance.

## **About Kaiser Optical Systems**

Kaiser Optical Systems, Inc., an Endress+Hauser company is a leader in Raman analyzers and components for spectroscopy including holographic optical elements. The company was formed in 1979 and has over 26 years of experience in Raman spectroscopy with customers located around the world. Additional company and product information is available at [www.kosi.com](http://www.kosi.com).

## **About S■PACT**

S■PACT is a 2010 technology spin-off of the renowned Aachen University RWTH which has a particular focus on the development and application of proprietary methods for the efficient, quantitative analysis of spectroscopic data. In addition, S■PACT supplies a comprehensive service around the design of complete solutions for process analytics, and collaborates with suppliers of the most powerful measuring instruments.
